## Medical RF Microneedling

Legend RF Microneedling delivers Hybrid Energy into the skin via an array of ultra-thin electrodes. RF energy heats the underlying layers to tighten the skin, as well as stimulating production of collagen, elastin and hyaluronic acid. Following delivery of the RF to the outer and deeper layers of the skin, the machine delivers a galvanic current that leads to a wound healing process. This treatment generates younger, smoother looking skin with significantly reduced pain and downtime. This combination treatment also includes a RF skin tightening and muscle lifting facial treatment and post-procedure skin care.

### LEGEND M<sup>2</sup>

Face	£450
Face, neck & décolleté	£515

## Dermapen Medical microneedling

Collagen induction therapy for production of natural collagen, elastin and hyaluronic acid.

- ◆ Cellulite
- ◆ Saddle bag area
- ◆ Arms
- ◆ Bra area
- ◆ Knees

1 area	£150
Per area, as part of a course	£115

## Signature SuperFacials

### The OptiLift<sup>©</sup>

Our state of the art 4-in-1 SuperFacial for tightening, brightening and lifting of the face and jawline £180

Enzymatic exfoliation and deep pore cleansing are followed by a gold standard radiofrequency skin tightening treatment. This results in instantaneous tightening and induces longer term collagen and elastin production. Dynamic Muscle Activation is then incorporated for toning of the facial muscles and the all-important SMAS layer of the lower face. This leads to lifting of the face and jawline that is one of the key reasons for the popularity of this treatment. Your doctor will assess your skin and overall health in order to ensure the optimal vitamin and amino acid cocktail in advance of a hydrating masque.

### The VitraLift<sup>©</sup>

A whole body experience that combines the OptiLift with a bespoke intravenous vitamin infusion to help boost energy levels and collagen production. £295

Your doctor will assess your overall state of health, as well as your skin, and will recommend a bespoke vitamin cocktail for an intravenous infusion whilst you enjoy your luxurious facial infusion and masque.
